

CHANCELLOR'S OFFICE WIRELESS CSUGUEST CONFIGURATIONS

CONNECTING TO GUEST WIRELESS NETWORKS USING WINDOWS XP BUILT-IN WIRELESS UTILITY

1. Verify wireless is enabled on your laptop.

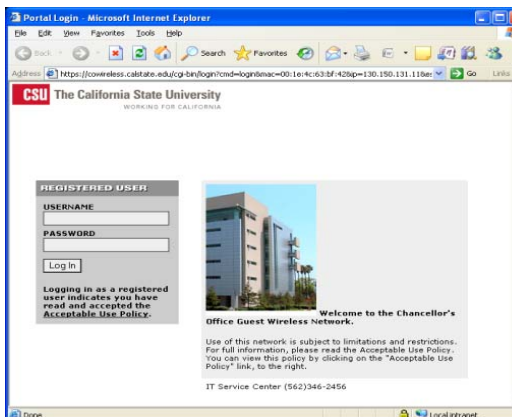

Hint: <Fn> <F2> or on/off switch

2. Start > Connect To > select Wireless Adapter.
3. Select "View Wireless Networks"
4. Select csuguest and click Connect.

3. Next, open a new webpage in your web browser and you will be redirected to the network authentication pages.

At the Authentication page, enter your Guest credentials provided by your sponsor.

CONNECTED TO THE WIRELESS NETWORK, WHAT HAPPENS NEXT?

1. To gain access to the internet, the next step is to authenticate on the network with the supplied guest credentials.

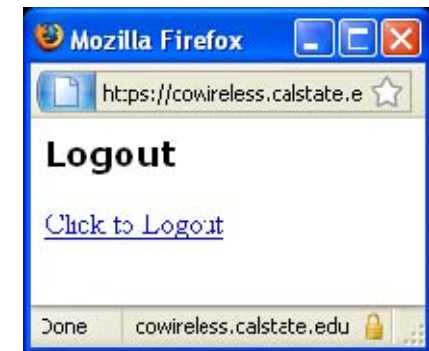

Note: If you don't have a guest credential, please contact your meeting host to acquire a sponsored guest account.

2. To begin the Authentication process, launch Internet Explorer.

You are now redirected back to your home page with full internet access.

A new window is also popped open, so you can logout CO's wireless network once you have completed your work.

Note: Guest clients may need VPN to their campus or company to access their internal resources.
